1: connect the coin selector. You can see the words "CL"

2: press"+""-"**at the same time**，letter"C" will be shown.

3：press "+"or "-" to adjust the coin quantity you want to use.. **Take 3 kinds of coin** ¢
1. ¢ **2.** ¢ **5as the example.** Adjust the number into "3" and press the set button to confirm.(number can be changed from1-6 which mean one coin-6 kinds coin)

4: you can see the words:**P1**. It means the the pulse for the first coin. **You can press "+" or "-" to adjust pulse you need**. Take the ¢ 1 =1 pulse as the example.Adjust number into 1 and press set button to confirm.

5: by such analogy. Set ¢2=2 pulse. ¢5 =5pulse.

6:When you finish setting the pulse for each coin, the word"CL" will be shown. Then press set button **for a few seconds** until you see the letter"A".

Letter "A" means that it is the time to choose the sample coin you want to use.

7: **press the set button again** . The word "A1" will appear. Put in 20 pcs   ¢1 sample coins. The word **A1** will be changed into **A2**. It is the time to put in 20 pcs   ¢2 sampls coins.

8:when you see word A3, pls put in 20 pcs ¢5 sample coin. When you see the word CL, it seems the coin selector has been programmed.
